RUBBER PROCESS OIL
WITPROL P – 145 (PARAFFINIC)

DESCRIPTION:-

Rubber is one of the vital commodity of the modern world. The growth of rubber industry has been impressive and continuously growing. Rubber materials are widely used in our everyday life. Most common usage are mainly in tyres, automotive supply industry, white goods, constructions, textiles and biomedical applications. WITMANS offers comprehensive range of Aromatics, Paraffinic and Naphthenic Rubber Process Oils which meets the requirements of rubber industries as well as tyre industries. Our Rubber Process Oils under brand WITPROL have following characteristics:

- **Assist in the mixing operations.**
- **Improve processability.**
- **Reduces compounding time.**
- **Modify the physical properties.**

WITPROL P – 145

Witprol P – 145 is light coloured paraffinic type of oil having medium viscosity and moderately high flash point. Witprol P - 145 oil is recommended to be used with EDPM & Butyl rubbers for the processing of Extruded goods, Automobile Tubes , Conveyor Belts , Molded Rubber articles, etc.,

PROPERTIES	UNIT	ASTM METHOD	SPECIFICATION	TYPICAL
Appearance	Attribute	Visual	Clear Liquid	Clear Liquid
Colour (ASTM)	Number	ASTM D – 1500	Max.2	< 2.0
Viscosity @ 40°C	Cst	ASTM D – 445	30 ± 5	28
Density @ 30°C	Gms/cc	ASTM D – 1298	0.850 ± 0.05	0.85
Flash Point	°C	ASTM D – 92	Min. 190	202
Aniline Point	°C	ASTM D – 611	Min. 95	108
Pour Point	°C	ASTM D – 97	Max. 0	-10

STORAGE:

Under roof recommended storage temperature Max.35°C.

DISCLAIMER:

Our products are produced using best of raw materials, advanced equipments, professional workforce and precise QC inspection system which ensures quality at all levels.
Our products are supported by well qualified and experienced Oil & Rubber Technologists.
We also formulate customized & tailor made Rubber Process Oils suitable to varied applications.
